Product features	P.002
Installation Guides	P.003-P.004
Wave panel series	P.005-P.044

4D Jigsaw series	P.045-P.068
3D Mosaic series	P.069-P.088
Wainscot & Ground Mat	P.089-P.098

1.What' s the Soft Leather Panel

- The panel is constructed by high quality PU Leather and high density memory PU foam, no back board and no glue. It can be cut by knife easily.

2.What' s the features

- Light weight, Simple designs, Easy clean and installation, Safe
- No need high temperature and pressure to make the super 3D relieves. It's to make sure the long-life of the PU leather
- Fire Retardant and ZERO Formaldehyde emission
- Widely use on interior Wall and Ceiling

→ **Back side is covered by PU leather too.**
It's to prevent the moisture from the wall in Spring time.

→ **Surface is covered by PU leather.**

→ **Water proof coating**

→ **Soft memory foam (Fire Retardant) inside**

Suitable for Wall & Ceiling in:

public areas: retail shop、lounge、window display、kindergarten、baby center、circle column ;

private areas: home theatre、bedroom、living room、wall and ceiling、wardrobe、door、ground mat ;

commercial areas: hotel、cinema、theatre、KTV room、night club、restaurant、beauty salon、cafe shop ;

Zero - formaldehyde

It's perfectly realized and certified to ZERO formaldehyde emissions by SGS.

Water and Moisture proof

Because of the excellent Pu leather on the back, it prevents the water and moisture to go through.

Fire retardant

The fire retardant performance reaches B in EN13501 and GB8624, was certified by SGS. It also produces very low smoke, and it is the taste of bamboo charcoal after burning, not irritating.

Sound proof

Because of the sharp 3D inclined block face and the high density foam inside, the sound will be faded and consumed gradually during the rebound between inclined faces.

Soft and high rebound

The panel is composed of high density foam. Its high rebound means not ruffle, never deform. It has excellent effect of collision avoidance.

Easy installation

No board on the wall, and no nail during installation, just use silicon to stick directly, free easy and fast.

Secondary use

After period of time, if the panels must be removed, they can be torn off and installed on the other wall.

Safety

Because of the light and soft, even if the wall paint falls off, the panels won't hurt people.

Bend easily

The panel embodies the professional wisdom when there is the circle or square column or the corner.

Acoustic absorption

The holes in the thick foam are to absorb the sound around.

F.R.: EN13501 (D-s2.d0)

ZERO Formaldehyde emission

ISO 354 Acoustic

Sound proof test

CE certificate

Invention Patent "Process of Synthesis Relief Product"

Installation guide I

1

Make sure the surface of the wall is clean. For lime wall, please paint with a coat of latex. Square off the wall according to the size of panels.

2

Silicon gun

Silicon

Hot-melt Glue Gun

Hot-melt Stick or double side tape

3

Apply the first panel on the lined bottom middle position, then, go ahead with the neighbour panels by the same way. When applying on the wall, press a little bit for around 15 seconds to make sure of no gap between. When the size of the wall won't match the panels, cut the panels by utility knife as need.

4

When there is outlet, measure the position on the panel and cut. Then put the inner box in the hole, cover the outlet.

Moulding Cutting & Installation

The length of the moulding is 290cm

1. Stick the panels on the wall, measure the size
2. The inner length of the moulding is the wall size. Cut by wooden-cutting machine on 45 degree
3. Brush the contact adhesive on both cutting sides
4. After few minutes, match the corners.
5. Drop silicon on the back of moulding, stick on the wall.

Installation of no joint corner

CHAPTER 1

WAVE PANEL SERIES

Art in full bloom on the wall and ceiling, it's warm, it's tender, it's friendly, it's rich and colorful. Enjoying the silence, leading us to an endless aftertastes.
